

FEDERAL FUNDING OPPORTUNITIES

FOR JUSTICE AND PUBLIC SAFETY

AGENCIES AND PARTNERS

The week of 07/01/24

INTRODUCTION

Purpose of Document:

This document provides information on current federal funding opportunities. It is intended that the resource will highlight key information to help jurisdictions make decisions about whether to pursue these funding opportunities. Please note that the solicitation or notice of funding that is linked serves as the official guidance on how to apply for the funding, required and allowable expenses, and deadlines. If a funding opportunity looks relevant to the work you are planning for, please read through each solicitation/notice of funding closely to respond to all requirements. Most of the Department of Justice funding opportunities require a two-step application submission process, each with its own deadline. All deadlines are noted in the descriptions.

Audience:

The grant programs listed in this document allow for a variety of eligible applicants, including state, local and tribal government entities and nonprofit organizations. Eligibility and target audience varies by program, so please read through the eligibility information. If your jurisdiction or organization is not eligible to submit the application, many programs allow and/or encourage partnerships through sub-grants and contracts with eligible applicants.

Grant Program Priorities:

For this resource, the grant programs that include priority language around advancing equity, supporting rural jurisdictions, or serving underserved populations are indicated by language highlighted on the grant program description page. See specific instructions in each solicitation/notice of funding to determine what information is required to receive the priority consideration. The priorities are defined below:

Advancing Equity Priority

Some grant programs will give priority consideration to applicants that propose project(s) that are designed to meaningfully advance equity and remove barriers to accessing services and opportunities for communities that have been historically underserved, marginalized, adversely affected by inequality, and disproportionately impacted by crime, violence, and victimization.

Underserved Community Priority

Some grant programs will give priority consideration to applicants that demonstrate that their capabilities and competencies for implementing their proposed project(s) are enhanced because they (or at least one proposed subrecipient that will receive at least 40 percent of the requested award funding, as demonstrated in the Budget web-based form) are a population-specific organization that serves communities that have been historically underserved, marginalized, adversely affected by inequality, and disproportionately impacted by crime, violence, and victimization.

Rural Priority

This indicates if a grant program includes language indicating a priority for funding rural jurisdictions.

Rural-Specific Category

This indicates if a grant program includes a category of funding restricted only to rural jurisdictions. Please note that each program typically provides definitions of a rural jurisdiction, and this may vary across programs, so read through each solicitation/notice of funding carefully to determine if your jurisdiction or target audience is eligible.

- Lack of funds for bus fare, subway or metro fare, ride-sharing expenses, and other transportation-related services;
- A need for clothing for adults, infants, children, or teens;
- Covering expenses for job readiness such as appropriate work attire or fees for apprenticeship programs or skill-building courses;
- Additional staff or staff time to provide and oversee these services; and

Description:

This program provides funding to support new and innovative strategies for preventing and reducing crime, improving community safety, and strengthening criminal justice system outcomes. BJA seeks to accomplish this by promoting collaborations with the field to identify, define, and respond to emerging or chronic crime problems or justice system challenges. BJA is looking for strategies that address these issues, including trying new approaches, addressing gaps in responses, building or translating research knowledge, or building capacity.

On July 2, 2024, at 1 p.m. ET, BJA will hold a webinar to provide a detailed overview of this opportunity and allow participants to ask questions. Register [here](#).

What can be funded?

The solicitation lists three categories of funding:

Category 1: State, local, or tribal innovations (with a research partnership)

Category 2: National or regional strategies to advance or translate knowledge

Category 3: Address the recent increase in carjacking incidents (with a research partnership)

BJA invites applicants to propose an innovative or unique solution, strategy, and/or response to

address critical and emerging public safety issues identified by law enforcement, prosecutors, and other criminal justice practitioners working in the field. Areas of particular interest to BJA, include, but are not limited to:

1. Develop innovative, fair, and equitable responses to combat, address, or otherwise respond to precipitous or extraordinary increases in crime, or in a type or types of crime, such as homicides, assaults, and hate crimes.
2. Address and support law enforcement and other criminal justice agencies in building trust and legitimacy with the communities they serve.
3. Build new or alternative strategies and systems such as restorative justice programs, community responder models, diversion programs, and strategies for addressing other public order infractions that can prevent unnecessary involvement in the criminal justice system and enhance outcomes for those already involved.
4. Accelerate justice through the creation of approaches and tools that build the capacity to gather and analyze data and information to understand key decision points and levers for change to strengthen safety while reducing unnecessary incarceration, community correctional control, and racial disparities, such as through effective pretrial processes and sentencing practices that prevent overincarceration and collateral consequences.
5. Explore innovative approaches that use technology and artificial intelligence to both enhance practices in investigations and prosecutions while safeguarding privacy, civil rights, and civil liberties, as well as manage the increasing complexity of crime related to these tools.
6. Via the Category 3 of activities, seek innovative ideas to address the recent increase in carjacking incidents, or implement strategies to advance or enhance public knowledge.

In addition to these areas of interest, BJA wants to hear ideas from the field that reflect the most recent, emerging issues and creative solutions to new and long-term challenges.
